

TP-2606 (Multiple Output, Dual Range)

Introduction

TP-2606 switching mode DC power supply provides 375W output capacity with three independent outputs and CH1/CH2 dual range output (30V/ 6A or 60V/3A), which accommodates a wide range of applications. On the basis of fixed output capacity, it enables output voltage or current to the maximum. With high power density and high conversion efficiency, multiple protections, high reliability, low noise and compact design, TP-2606 is completely adequate for satisfying mainstream power supply demands.
